

Quick Booster Coils

This feature provides a quick way to view the drawing, rate, and price of the available Booster Coils. It is also a quick way to add the coil to any project. If the Booster Coil will be part of a project, select the project. If you do not select a project, the Booster Coil can be saved to the work area.

- Select “Booster” from the Quick menu or click the .

- Select a Booster Coil from the list.

- The part number in the box above the CFM/Coil information shows the appropriate model.
- To see the drawing, click the button.
- To rate this coil, select the appropriate values, and click the button.
- To save the coil, click the button.

Note: Without rating a coil every time, you can see the “leaving conditions” of a different model by watching the box above the ‘Save’ button. This is a great tool for doing schedules.
